

Section 3 Skills

Creation

Usage

Evolution

Section 2 Harness Paradigm

Task
Loops

Cross-Task
Reuse

Runtime
Systems

Section 4 Memory

Representation

Operation

Evolution

Section 5 Environment

Executability

Learnability

Protocolization

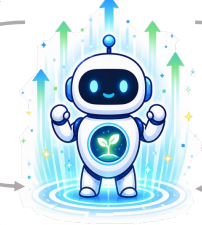

Self-Evolving Agentic AI

Response

Action

Feedback

Reward

Section 6 RL & CL

Pre-deployment
Training

Harness Ability

Post-deployment
Training

Live Traces
Logs in the wild

Section 7 Meta-Evolving Agent

Structures

Strategies

Meta-layer

Section 8 Benchmarks

Held-out
gain

Backward
retention

Improvement
efficiency

Path
attribution

Longitudinal
stability

Safety
non-regression

Section 9 Safety

Skill hijacking

Memory poisoning

Protocol exploit

Alignment drift

Feedback manipulation
